“Nitrogen Smart” training presents the fundamentals for maximizing economic return on your nitrogen investment and minimizing nitrogen losses. Learn:

- Sources of nitrogen for crops
- How nitrogen is lost from soil and how you can reduce losses
- Managing nitrogen in drainage systems
- What do the new Nutrient Reduction Strategy and Nitrogen Management Strategy mean for Minnesota producers?
- Split applications, alternative N fertilizers, soil and tissue testing, N models and other tools to refine your management approach.

Are you Nitrogen Smart?
Nitrogen Smart: Fundamentals
Spring 2016 schedule. No registration necessary.
